

## J-Panel Product Statement

### Overview

J-Panel is an edge laminated solid lumber panel product.

J-Panel is made from 100% sustainable NZ Radiata pine grown in accordance with strict quality and environmental standards.

J-Panel is constructed by gluing small end section pieces of quarter sawn NZ Radiata pine lumber (lamina) together to form a wider section panel.

J-Panel is extremely strong and dimensionally stable product that is suitable for interior joinery applications where appearance and aesthetic values are appreciated.

J-Panel is manufactured in a range of easy-to-handle panel sizes and comes in a Clear 2 grade.
